

Dutch canopies

Veranda awning

## Awnings and Canopies

With the unreliability of our climate here in the UK, an awning increases the potential time available for you to unwind and enjoy the fresh air. Our awnings keep you cool on the hottest days, but also enable you to enjoy using your patio when the weather is less than perfect, so that it becomes a proper extension to your home. Awnings also help protect carpets and soft furnishings from fading, without having to draw the curtains and lose the outdoor view, and will help to protect precious plants from drying out in really hot weather.

We provide 4 basic solutions:

Folding arm awnings -Fabric cover unwinds from a roller barrel via a pair of sprung folding arms.

Dutch awnings -Fabric is attached to a frame of pivoting hoops that hinge open and closed.

Framed veranda awnings -Awning cover unrolls and is drawn along a permanent fixed frame.

Fixed canopies -Also know as approach awnings, fabric in attached to a shaped framework.

Specification	Standard	Optional
Headbox (folding arm)	Aluminium powder coated	no box -open fixing bar
Fabric	Specialised acrylic canvas	PVC laminated fabric
Manual control	Crank handle gear	Cord lift/gravity fall
Motorised control	240 volt motor	Sun and wind sensors

## Control Options
